

AUCOTEC continues to grow!

In order to continuously expand our market share, we are looking for

Product Manager / Solution Expert (m/f/d)

Your area of responsibility:

The Product Management department of AUCOTEC is responsible for strategical planning and design of a portfolio of engineering software CAE tools and platforms. AUCOTEC is established in 1985 and so far has 45,000+ active licenses of its products all around the world. The main product of AUCOTEC is Engineering Base and its application in the plant industry segment with 11.400 active licenses around the world. Solution Expert – Plant, is an individual that gets trained in a special niche of Engineering Base. Product Managers / Solution Experts will perform various discussions with our clients and internal consultants as well as our R&D team about specific engineering challenges and articulate them to be solved. Together with a team of Software Engineers, the Product Manager / Solution Expert will drive the design and development of a solution for the described challenge and run the iterations of validation and verification until final acceptance of the solution in the market and AUCOTEC customers. This position can contain exciting technical discussions with experts of different companies in different industry sectors around the world and participation in conferences and exhibitions.

Skills / Requirements:

- Process Engineering, Chemical Engineering, Mechanical Engineering, Process Automation
- At least 5 years of experience in the field of engineering or technical software or Plant Design CAE tools
- Strong communication skills, negotiation skills on all levels (C-Level as well as engineers and users)
- Confident appearance, sense of responsibility, commitment
- Strategic mindset and solution-oriented
- Native or high proficiency in German, high proficiency in English

Location

AUCOTEC HQ in Hannover, Germany or one of the other branch offices

We offer you:

- A safe job in a promising market
- Flexible working hours according to an agreement and operational conditions
- Company training and qualifications
- A very good working atmosphere as a member of a dynamic team
